

Solar Carport Parking Canopy System

Dual-Cantilever Structure | 2 Vehicles (Nose-to-Nose)

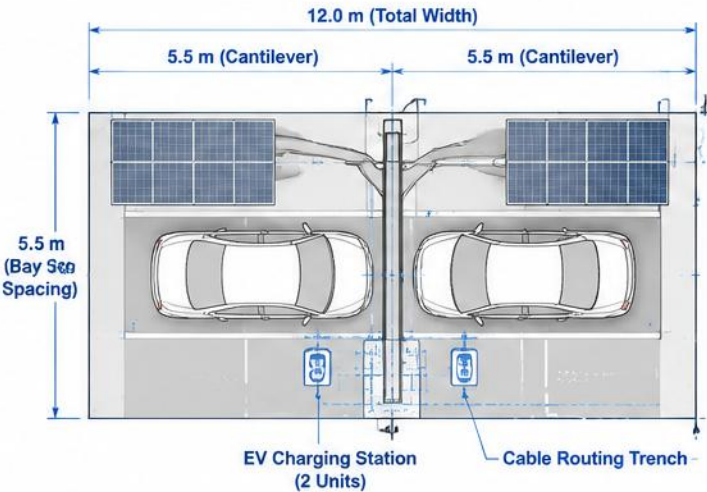

Front Elevation (Cross-section)
Scale: 1:50

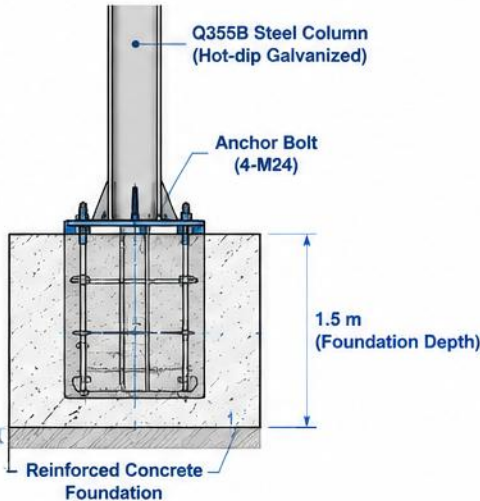

Side Elevation (Longitudinal View)
Scale: 1:50

3D Isometric View
Scale: N.T.S.

Site Layout Plan (Top View)
Scale: 1:100

Foundation Reaction Moment
& Anchor Cage Detail
Scale: 1:20

Main Specifications	
Total Width (Overall)	12.0 m
Cantilever Length (Each Side)	5.5 m
Bay Spacing (Longitudinal)	5.5 m
Vehicle Clearance (Min.)	2.8 m
Tilt Angle (Solar Panels)	10°
Main Column	Q355B Steel (Hot-dip Galvanized)
Rafter Arm	Q355B Steel (Hot-dip Galvanized)
Foundation	Reinforced Concrete
Anchor Bolts	M24 (4 pcs per column)

- Notes:
- All dimensions are in meters unless otherwise specified.
 - Structure designed for 2 vehicles (nose-to-nose).
 - Solar panels tilt angle: 10°.
 - Steel components are hot-dip galvanized for corrosion resistance.
 - Foundation size and rebar details to be confirmed by geotechnical report.
